

Non-Executive Directors

The Royal Devon and Exeter NHS Foundation Trust is a vibrant and dynamic organisation with an annual income of £345m. We employ more than 5,800 staff and provide hospital services to a community of 350,000 people throughout the South West region. As a leading acute hospital Trust and one of the first NHS Trusts to be granted foundation status in 2004, we have an enviable reputation for providing high quality, innovative care to our patients and we are currently looking to appoint two dynamic and commercially astute Non-Executive Directors to join the board and help us build further on our success.

The Role

- Working as part of a unitary board, overseeing the performance of the Trust and advising on the development of strategies for providing innovative health services for the community
- Sharing responsibility with other board members for ensuring the best use of financial resources to maximise benefits for patients and deliver the highest standards of healthcare
- Facilitating constructive debate, and bringing independent and objective judgement to bear on issues of strategy, governance, performance and resources
- Acting as an ambassador for the Trust and representing the organisation with patients, the local community and stakeholders

The Candidate

- Significant experience of operating at senior/board or non executive level within a large, complex organisation, coupled with an understanding of corporate governance
- Expertise required to balance the skills on the board and on this occasion we are seeking individuals with senior financial management experience and an accountancy qualification or a background in business strategy, marketing/business development, quality and supply chain management or corporate legal services
- Able to demonstrate an ability to challenge, influence and build consensus on a wide range of issues
- Eligible to be a member of one of the Foundation Trust's public constituencies and therefore reside in Devon, Cornwall, the Isles of Scilly, Somerset or Dorset
